

EtherCake

Whitepaper - March 2022

About Us

EtherCake is a community-driven rewards token that is deployed on Binance Smart Chain. \$ECAKE holders receive both ETH and CAKE rewards automatically every 60 minutes. The project is led by an experienced team that is respected in the crypto space. Their planned multi-chain staking platform and launchpad are just some of the things you can look forward to.

To help protect from whales dumping or from holding high percentages of the supply, we feature a 0.5% max sell, a 2% max buy, and a 2% max hold.

\$ECAKE and its team have ambitious plans for the future of the token and its planned ecosystem. The ecosystem will consist of multi-chain staking, decentralized exchange, and IDO platform.

Token Rewards

\$ECAKE holders are rewarded in both ETH and CAKE every 60 minutes automatically. There is no claiming required (you can claim manually at any time). Users can track their rewards on our dashboard.

From there, users can see the following information:

- Pending rewards
- Paid rewards
- Time of last reward
- Time till next reward payment
- Number of tokens held
- Total rewards paid in ETH and CAKE
- Total rewards paid in USD

Ecosystem

Dashboard

The \$ECAKE dashboard will be a place for users to track their rewards. That was explained in the “Token Rewards” section above.

Staking

Users will be able to stake a variety of tokens on our staking platform to earn more rewards. Initially it will be on Binance Smart Chain but more blockchains will be supported later on including Ethereum (2.0), Polygon, Avalanche, Fantom, and more.

Launchpad

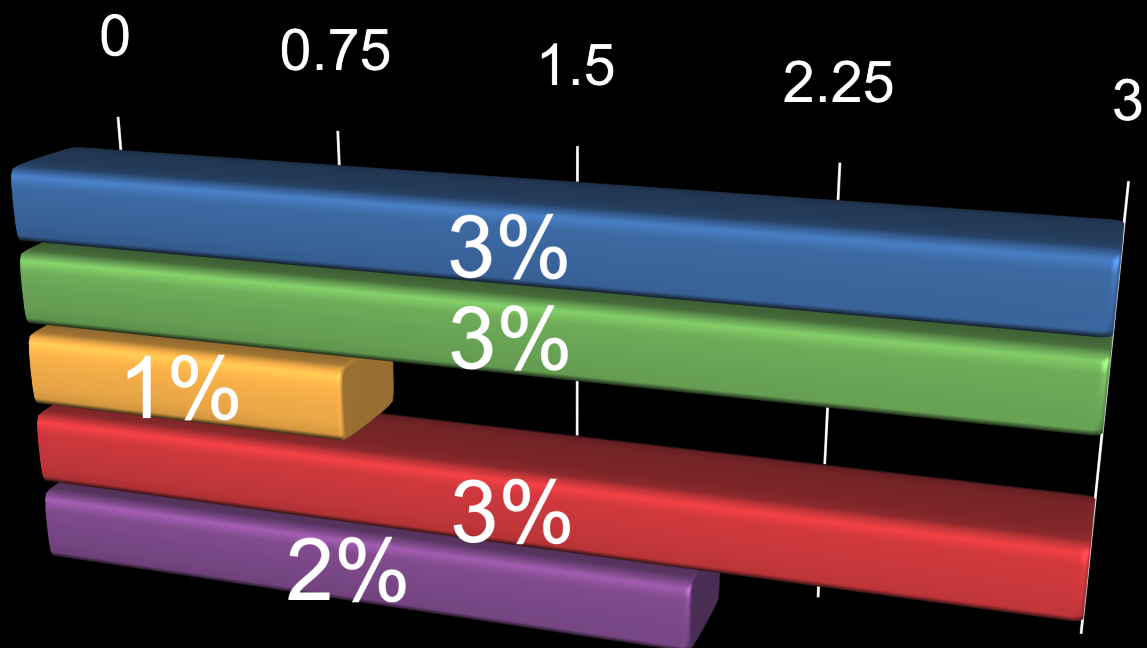

The planned launchpad will consist of two “launch” options. One will allow any projects (like Pinksale) and the other will be much stricter to only allow for vetted projects. In addition to the typical fairlaunch/presale options, we will also include:

- Token and LP locking
- Token vesting
- Token creation
- Token bulk-send

As with our staking platform, it will be on Binance Smart Chain initially, but more blockchains will be supported later on including Ethereum (2.0), Polygon, Avalanche, Fantom, and more.

Tokenomics

Each \$ECAKE transaction is taxed 12% which is split into ETH + CAKE token rewards, liquidity, marketing, and staking. On sells, the tax is increased to 15%. There is a 0.5% max sell, 2% max buy, and a 2% max wallet balance to help prevent whales.

Supply Breakdown

1,000,000,000 \$ECAKE

- Presale
- Staking Pool
- Airdrop
- Marketing
- Dev
- Team

Roadmap

Feb 2022

- Token planning
- Market research
- Marketing planning
- Starting development

March 2022

- Website reveal
- Telegram creation
- Twitter creation
- Airdrop

April 2022

- Deploy token
- Fair launch on Pinksale
- Marketing push
- Launch on Pancakeswap

Q2 2022

- CoinGecko Listing
- CoinMarketCap Listing
- Trust Wallet listing
- Influencer posts

Q2 2022

- Staking platform
- Heavy marketing push
- Influencer partnerships
- Additional CEX listings

Q3 2022

- Launchpad reveal
- Multi-blockchain staking
- Heavy Marketing
- Company partnerships
